March 4th Presenters:

MASON LAUTENSCHLAGER

Mason Lautenschlager ranches in Berthold with his wife, Hannah, and three young children. They manage 2,400 acres of native and tame perennial pastures with a blend of a cow herd and yearlings. Mason has implemented numerous holistic management practices, including summer calving, rotational grazing with long rest periods, electric fencing, energy-free water infrastructure, bale grazing, and swath grazing.

BRANDON BOCK

Bock Farms believes in one simple approach; by improving the soil, the soil will take care of our faith, our environment, our community, and ourselves. They accomplish this through regenerative farming. Their farm is on a journey to heal the land that has been degraded over roughly 120 years by tillage, high synthetic fertilizer, chemical use, and lack of diversity. Healthy soil means grain with nutrient density and diversity that is free from chemical residue.

GAGE IVERSON

Gage Iverson is a 5th generation rancher on the Dovetail Creek Ranch north of Winnett MT. In summer 2019, a fire burned 50% of their summer pasture. In 2020 the ranch went through a grasshopper induced drought, followed immediately the next year by an actual drought. These events ultimately led Gage to begin practicing regenerative agriculture to increase the available grazing days. Four years later, Gage has doubled the stocking rate of these pastures and has begun questioning industry paradigms of what is really required to run cattle in Central Montana.

March 5th Presenter:

REG SHANDRO

Reg Shandro defies classification, with a unique combination of technical and soft skills in agriculture, finance, and family conflict and mediation. He has developed a proprietary process that is practical and effective, building family harmony and farm prosperity. Assisting farmers with succession planning and managing conflict is his calling.

**Join us for a full day of
succession planning!**
